★ New Seller? Start Here

The recommended workflow for new sellers is: **Bulk Upload** your cards first to create listings quickly, then use **Add Card** to fine-tune each listing individually. See page 7 for the full explanation.

1. Dashboard Overview

tcgnakama.com/seller/dashboard — Your starting point

After logging in, you land on your **Seller Dashboard**. This is your control center. It shows your store profile and gives you quick access to all 5 seller tools.

V My Vault

View and manage all your listed products. Edit stock, appraise values, delete listings, and sync to Shopify.

+ Add Single Card

List one card at a time with full control over every detail. Best for editing existing listings or adding a single premium item.

↑ **Bulk Upload**

Upload up to 50 card images at once. AI automatically identifies each card and suggests pricing. Best for batch listing.

≡ **My Orders**

View all customer orders, filter by status, and track total revenue.

📍 **My Storefront**

Customize your seller brand — upload logo, banner, tagline and social links.

2. My Vault

tcgnakama.com/seller-admin — Your inventory command center

The screenshot shows the 'My Vault' interface on tcgnakama.com/seller-admin. It features a search bar at the top, followed by sections for 'Active Inventory', 'Active Leaderboard', and 'My Sales Hub'. The 'My Sales Hub' section displays a 'TOTAL INVENTORY VALUE' of ¥2,316 and an 'ASSET DISTRIBUTION' table. Below these is the 'VAULT OPERATIONS LEDGER' which includes a search bar, a 'SORT BY' dropdown set to 'Most Recently Added', and a table of items. The table has columns for #, ASSET, STOCK, AGE, VALUE (¥), MARKET (¥), BUY PRICE, SELL PRICE, Q/L (%), GRADE, STORAGE, and ACTIONS. One item is listed: 'Garchoomp & Giratina-GX - sm12a #099/173' with a stock of 1 and an age of 1 Day.

#	ASSET	STOCK	AGE	VALUE (¥)	MARKET (¥)	BUY PRICE	SELL PRICE	Q/L (%)	GRADE	STORAGE	ACTIONS
1	Garchoomp & Giratina-GX - sm12a #099/173	1	1 Day	¥2316			N/A	N/A			APPRAISE

The Vault is where all your listings live. Every card you upload (via Bulk Upload or Add Card) appears here. You can monitor inventory value, appraise cards, and manage each listing.

Column

What it means

Asset

Card name and thumbnail image

Stock

How many units you have available

Age

How long this card has been listed

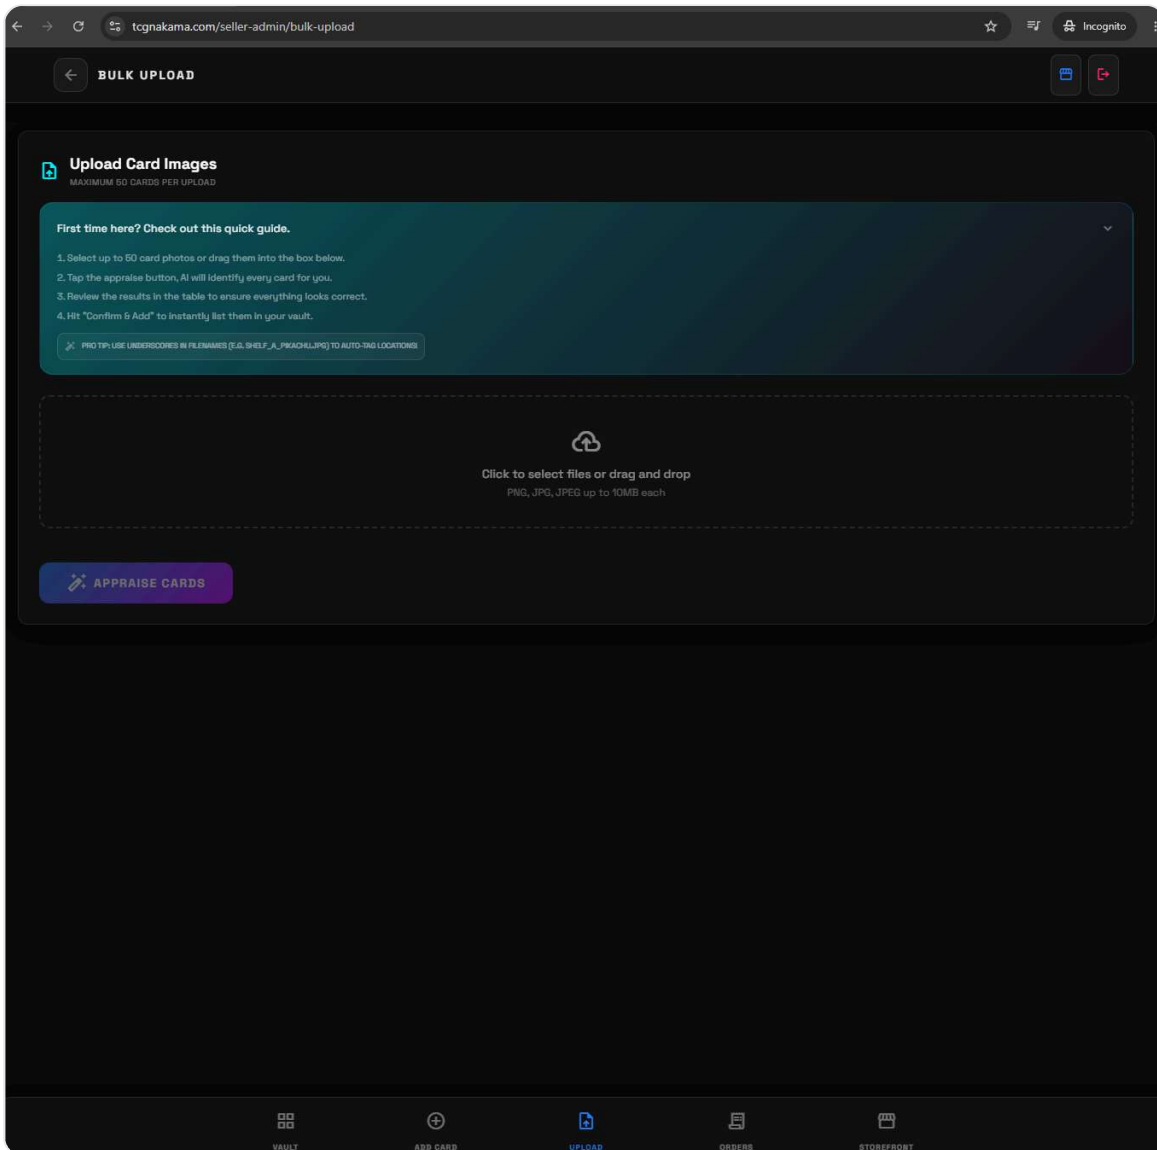

Value (¥)	Current market appraisal value
Market (¥)	Live market price reference
Sell Price	The price buyers see on your storefront
Actions	Edit, Delete, or toggle visibility

💡 **Tip:** Click **APPRAISE** next to any card to let AI re-evaluate its current market value based on the latest data.

💡 **Sync Shopify:** Use the SYNC SHOPIFY button to push all vault listings to your connected Shopify store instantly.

3. Bulk Upload

tcgnakama.com/seller-admin/bulk-upload — Upload many cards at once

Bulk Upload is designed for speed. Upload photos of your card fronts and let AI do the heavy lifting — it identifies every card, writes descriptions, and suggests market prices automatically.

1 Select card images

Click the drop zone or drag and drop up to 50 PNG/JPG/JPEG images. Max 10MB each. Only upload the front side of each card.

2 Click "Appraise Cards"

AI analyzes every image simultaneously — identifying the card name, set, rarity, condition, and suggested market price.

Review the results table

3 Check that AI identified each card correctly. You can adjust any field in the table before confirming.

4 Click "Confirm & Add"

All cards are instantly added to your Vault and made live on your storefront.

 **Pro Tip:** Name your files with underscores for the shelf location (e.g. shelf_A_pikachu.jpg) to auto-tag storage locations.

 **Limit:** Maximum 50 cards per upload session. For larger collections, run multiple upload sessions.

4. Add Card

tcgnakama.com/seller-admin/add-card — Fine-tune individual listings

First time here? Check out this quick guide.

1. Upload your card photo below.
2. Tap the appraise button, AI will fill in the form for you.
3. Review the details and fix anything that doesn't look right.
4. Hit "Save All Changes" to save your card.

JUST ADDING MORE PICTURES?

1. Upload your additional photos above.
2. Skip the Appraise button — no need to re-analyze.
3. Hit "Save All Changes" to save.

VAULT ADD CARD UPLOAD ORDERS STOREFRONT

Add Card gives you full control over a single listing. Use it to edit an existing card's details, add extra photos, or create a carefully curated listing for a premium item.

- 1 Upload card image(s)**
Drop images or paste an image URL. You can upload multiple angles (front, back, close-up of condition).
- 2 Click "Appraise Card with AI"**
AI fills in Card Name, Set, Rarity, Description, and suggested Sell Price automatically.
- 3 Review & edit all fields**
Check Core Identity (name, description, price) and TCG Parameters (vendor, set code, rarity, condition, storage).

4 Click "Save All Changes"

The listing is saved to your Vault and published to your storefront.

💡 **Just adding photos?** Upload your extra images, skip the Appraise step, and hit Save directly — no need to re-analyze the card.

MOST COMMON CONFUSION

Bulk Upload vs. Add Card — What's the Difference?

Understanding when to use each tool will save you a lot of time.

Bulk Upload

Use when you have **multiple cards to list at the same time**

- Upload 2–50 card front images at once
- AI identifies and prices all cards together
- Creates multiple listings in one action
- Only needs the front-side photo
- Best for: new stock, batch listing

Add Card

Use when you need to **edit or fine-tune a single listing**

- Edit one listing at a time
- Full control over every field
- Add multiple photos (front + back)
- Adjust price, condition, description
- Best for: editing after bulk upload

The Recommended Workflow

For a seller with 10 new cards to list, here is the correct step-by-step process:

Simple Rule to Remember

Bulk Upload = CREATE listings fast (front image only, AI does the rest)

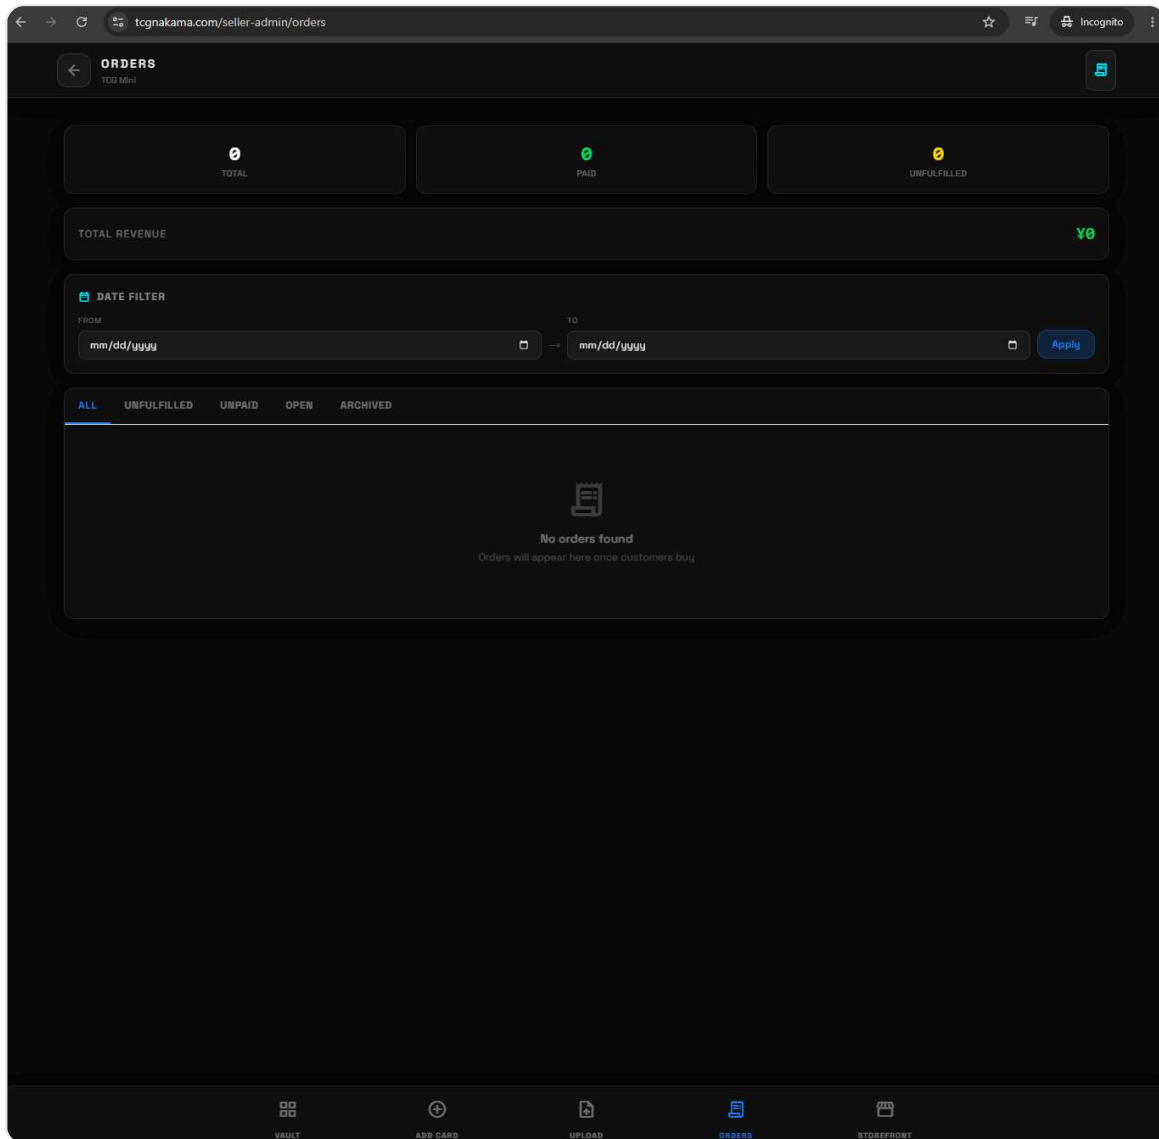

Add Card = EDIT listings individually (full details, multiple photos)

Think of Bulk Upload as the "*factory*" that creates your listings, and Add Card as the "*workshop*" where you polish each one.

 **Common Mistake:** Sellers sometimes go directly to Add Card to list 10 cards — this means filling the form 10 times separately. Use Bulk Upload first, then edit with Add Card only if needed.

5. My Orders

tcgnakama.com/seller-admin/orders — Track your sales

The Orders page shows all customer purchases that include your cards. Use the date filter and status tabs to track payments and fulfillment.

Tab

What it shows

All

Every order ever placed

Unfulfilled

Orders that need to be shipped

Unpaid

Orders awaiting payment

Open	Active orders in progress
Archived	Completed and closed orders

💡 Use the **Date Filter** to view orders within a specific period and calculate your revenue for that time range.

💡 Total Revenue is shown in Japanese Yen (¥) at the top of the page.

6. My Storefront

tcgnakama.com/seller-admin/storefront — Build your brand

The screenshot shows the 'Storefront Branding' interface on the TCGNakama website. At the top, there's a navigation bar with 'Dashboard / My Storefront' and buttons for 'Preview Store' and 'Logout'. The main heading is 'Storefront Branding' with a subtitle 'Customise how your store looks to buyers on TCGNakama.' Below this is a 'LIVE PREVIEW' section showing a banner for 'MYTHIC DECK' with the text 'YOUR ONLINE TCG DESTINATION' and 'TCG Mini Japan's trusted seller'. The interface is divided into two main sections: 'STORE LOGO' and 'STORE BANNER'. The 'STORE LOGO' section shows a square image placeholder for 'THE MYTHIC DECK' with a 'Click to replace' button. The 'STORE BANNER' section shows a wide banner placeholder for 'MYTHIC DECK' with a 'Click to replace' button. Below these is the 'STORE DETAILS' section, which includes fields for 'Store Name' (currently 'TCG Mini'), 'Tagline' (currently 'Japan's trusted seller'), and 'Store Description' (currently 'Based in Shibuya the center of collectibles. Follow our social media for more info!'). There are also fields for 'Social Links' for Instagram, Twitter / X, and Website. A green 'SAVE BRANDING' button is at the bottom.

Your Storefront is your public seller profile on TCGNakama. Buyers see your logo, banner, tagline, and social handles when they visit your store page.

1 Upload your Logo

Square image recommended. This appears next to your store name everywhere on the site.

2 Upload your Banner

Wide landscape image (min 1200×400px). Shown as the hero image at the top of your store page.

3 Add your Tagline

A short memorable phrase under your store name. Example: "Catch Japan's Finest."

4 **Add Social Links**

Instagram and Twitter/X handles. These appear as clickable @handles on your storefront, helping buyers follow you.

Stores with complete profiles get more trust

Sellers with a logo, banner, and tagline receive a **Trusted Seller** badge displayed on their store page, which increases buyer confidence and conversion rates.
